Education

Chinmaya Vishwavidyapeeth — Ernakulam, Kerala
Bachelor of Technology in Computer Science; CGPA: 9.45/10.0 — *July 2024 – May 2028*

Experience

Custom Bakery Catalog — Freelance
Web Developer — *Ongoing*

- Building a responsive catalog website for a local bakery business to support online product showcasing and customer orders
- Implementing WhatsApp-based order redirection to convert browsing interest into direct customer inquiries
- Focusing on user-friendly design and optimized product image presentation for better browsing experience

Mobile App Quality Assurance
Manual QA Tester — *Ongoing*

- Performed functional and regression testing to identify UI/UX inconsistencies and logic-related bugs
- Documented bugs and test observations to support developers in improving application stability

Projects

HydroNet – Smart Water-Independent Farming System | Live Demo — *Ongoing*
Microcontroller, Hydroponics, IoT Sensors, Solar Energy Systems

- Designing and developing a self-sustaining hydroponic farming system integrated with an Atmospheric Water Generator (AWG) to enable plant growth without external water sources
- Implementing condensation-based water generation from air, with storage and nutrient enrichment to create a continuous hydroponic solution
- Building an automated monitoring system using sensors to track pH, EC, temperature, water level, and light intensity
- Developing control logic for pumps and nutrient dosing systems to dynamically regulate water flow and nutrient balance
- Integrating solar power for energy-efficient, off-grid operation suitable for water-scarce and remote environments

Leadership & Activities

Innovation and Entrepreneurship Development Centre (IEDC) — Kerala, India
Community Lead — *Feb 2026 – Present*

- Supporting community engagement initiatives and technical event planning

Innovation and Entrepreneurship Development Centre (IEDC) — Kerala, India
Quality & Operations Sub-Lead — *Feb 2025 – Feb 2026*

- Coordinated technical events including idea pitching sessions, hackathons, workshops, and talk sessions
- Collaborated with multiple colleges and student communities to improve participation and outreach
- Supported operational planning and ensured smooth event execution

Technical Skills

Languages: Python, Java, C, SQL
Libraries/Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn
Databases: MySQL
Concepts: Object-Oriented Programming, Data Structures and Algorithms, Operating Systems, DBMS

Certifications

Google Crash Course on Python
Core Java Training – Techmasters Software Services Ltd., Trivandrum
Python Course – Analytics Vidhya
